

Information

To answer the questions In this quiz you will perform several virtual Small Angle Neutron Scattering (SANS) experiments on samples which are hard, dilute spheres in solution. You can perform the virtual experiments by logging onto [the virtual SANSsimple instrument](#) and varying the input parameters.

Depending on your answer, you will get different kinds of feedback - even if the answer is correct. You can follow your progress in the top left corner. You can check your answer each time you give it.

Enjoy!
